
Volume 1 Contents

ThA1LP -- Opening Ceremony and Plenary Lecture

Chairs: *H. Timothy Bunnell, Alfred I. duPont Institute; and Richard A. Foulds, Alfred I. duPont Institute*

1. [The Comparative Study of Spoken-Language Processing](#) Anne Cutler
-
-

ThA2L1 -- Large Vocabulary

Chair: *Michael D. Riley, AT&T Labs - Research*

1. [New Developments in the INRS Continuous Speech Recognition System](#) Z. Li, M. Heon, Douglas O'Shaughnessy
 2. [On Designing Pronunciation Lexicons for Large Vocabulary, Continuous Speech Recognition](#) Lori Lamel, Gilles Adda
 3. [Word Graph Rescoring Using Confidence Measures](#) Pablo Fetter, Frédéric Dandurand, Peter Regel-Brietzmann
 4. [A Bottom-up Approach for Handling Unseen Triphones in Large Vocabulary Continuous Speech Recognition](#) X.L. Aubert, Peter Beyerlein, Meinhard Ullrich
 5. [Discriminative Optimisation of Large Vocabulary Recognition Systems](#) V. Valtchev, P.C. Woodland, S. J. Young
 6. [Japanese Large-vocabulary Continuous-speech Recognition using a Business-newspaper Corpus](#) Tatsuo Matsuoka, Katsutoshi Ohtsuki, Takeshi Mori, Sadaoki Furui, Katsuhiko Shirai
 7. [Handling Compound Nouns in a Swedish Speech-understanding System](#) David Carter, Jaan Kaja, Leonardo Neumeyer, Manny Rayner, Fuliang Weng, Mats Wren
 8. [Initial Evaluation of a Preselection Module for a Flexible Large Vocabulary Speech Recognition System in Telephone Environment](#) J. Macias-Guarasa, A. Gallardo, J. Ferreiros, Jose M. Pardo, L. Villarrubia
-
-

ThA2L2 -- Multimodal ASR (Face and Lips)

Chair: *Eric Petajan, Bell Labs - Lucent Technologies*

1. [Asynchronous Integration of Visual Information in an Automatic Speech Recognition System](#) Mamoun Alissali, Paul Deleglise, Alexandrina Rogozan
 2. [Audiovisual Speech Recognition using Multiscale Nonlinear Image Decomposition](#) I.A. Matthews, J. Bangham, S.J. Cox
 3. [Robust Audiovisual Integration using Semicontinuous Hidden Markov Models](#) Qin Su, Peter L. Silsbee
 4. [The Effect of Visual Information on Word Initial Consonant Perception of Dysarthric Speech](#) Richard P. Schumeyer, Kenneth E. Barner
 5. [A Multiple Deformable Template Approach for Visual Speech Recognition](#) Devi Chandramohan, Peter L. Silsbee
 6. [Speaker Independent Bimodal Phonetic Recognition Experiments](#) P. Cosi, E. Magno Caldognetto, F. Ferrero, M. Dugatto, K. Vaggas
 7. [Speechreading using Shape and Intensity Information](#) Juergen Luetttin, Neil A. Thacker, Steve W. Beet
 8. [Speaker Identification by Lipreading](#) Juergen Luetttin, Neil A. Thacker, Steve W. Beet
-
-

ThA2L3 -- Perception of Words

Chair: *Sharon Manuel, Emerson College and Massachusetts Institute of Technology*

1. [How Word Onsets Drive Lexical Access and Segmentation: Evidence from Acoustics, Phonology and Processing](#) *David W. Gow Jr., Janis Melvold, Sharon Manuel*
2. [RAW: A Real-speech Model for Human Word Recognition](#) *David van Kuijk, Peter Wittenburg, Ton Dijkstra*
3. [How Facilitatory can Lexical Information Be During Word Recognition? Evidence from Moroccan Arabic](#) *Mehdi Meftah, Sami Boudelaa*
4. [Effects of Frequency on the Auditory Perception of Open- Versus Closed-class Words](#) *Alette P. Haveman*
5. [Phonotactic and Metrical Influences on Adult Ratings of Spoken Nonsense Words](#) *Michael S. Vitevitch, Paul A. Luce, Jan Charles-Luce, David Kemmerer*
6. [Lipreading Supplemented by Voice Fundamental Frequency: To What Extent Does the Addition of Voicing Increase Lexical Uniqueness for the Lipreader?](#) *Edward T. Auer Jr., Lynne E. Bernstein*
7. [Strategies Used in Rhyme-Monitoring](#) *S. te Riele, S.G. Nooteboom, H. Quené*
8. [How do Dutch Listeners Process Words with Epenthetic Schwa?](#) *Wilma van Donselaar, Cecile Kuijpers, Anne Cutler*

ThA2P1 -- Phonetics, Transcription, and Analysis

Chair: *Jim Hieronymus, Bell Labs - Lucent Technologies*

1. [Whole-word Phonetic Distances and the PGPfone Alphabet](#) *Patrick Juola, Philip Zimmermann*
2. [Automatic Vowel Quality Description using a Variable Mapping to an Eight Cardinal Vowel Reference Set](#) *Shuping Ran, J. Bruce Millar, Phil Rose*
3. [Automatic Detection and Segmentation of Pronunciation Variants in German Speech Corpora](#) *Andreas Kipp, Maria-Barbara Wesenick, Florian Schiel*
4. [ANGIE: A New Framework for Speech Analysis Based on Morpho-phonological Modelling](#) *Stephanie Seneff, Raymond Lau, Helen Meng*
5. [Perceptual Contrast in the Korean and English Vowel System Normalized](#) *Byunggon Yang*
6. [On Phonetic Characteristics of Pause in the Korean Read Speech](#) *Yong-Ju Lee, Sook-hyang Lee*
7. [Cross-Language Effects of Lexical Stress in Word Recognition: The Case of Arabic English Bilinguals](#) *Sami Boudelaa, Mehdi Meftah*
8. [Automatic Generation of German Pronunciation Variants](#) *Maria-Barbara Wesenick*
9. [Estimating the Quality of Phonetic Transcriptions and Segmentations of Speech Signals](#) *Maria-Barbara Wesenick, Andreas Kipp*
10. [An Acoustic Analysis of Contemporary Vowels of the Standard Slovenian Language](#) *Bojan Petek, Rastislav Sustarsic, Smiljana Komar*
11. [Using Decision Trees to Construct Optimal Acoustic Cues](#) *Sandrine Robbe, Anne Bonneau, Sylvie Coste, Yves Laprie*
12. [Maximum Jaw Displacement in Contrastive Emphasis](#) *Donna Erickson, Osamu Fujimura*
13. [Subglottal Pressure and Final Lowering in English](#) *Rebecca Herman, Mary Beckman, Kiyoshi Honda*
14. [Phonological Variation: Epenthesis and Deletion of Schwa in Dutch](#) *Cecile Kuijpers, Wilma van Donselaar, Anne Cutler*
15. [Can a Moraic Nasal Occur Word-initially in Japanese?](#) *Takashi Otake, Kiyoko Yoneyama*

ThA2P2 -- Spoken Language Processing for Special Populations

Chair: *Valerie Hazan, University College London*

1. [Feedback Considerations for Speech Training Systems](#) *James J. Mahshie*
2. [Clinical Applications of Computer-Based Speech Training for Children with Hearing Impairment](#) *Anne-Marie Öster*
3. [Enhancing Information-rich Regions of Natural VCV and Sentence Materials Presented in Noise](#) *Valerie Hazan, Andrew Simpson*
4. [Speech Perceptual Abilities of Children with Specific Reading Difficulty \(Dyslexia\)](#) *Valerie Hazan, Alan Adlard*
5. [Bimodal Perception of Spectrum Compressed Speech](#) *Larry D. Paarmann, Michael K. Wynne*
6. [Effect of Sentential Context on Syllabic Stress Perception by Hearing-impaired Listeners](#) *Dragana Barac-Cikoja, Sally Revoile*
7. [Applications of Automatic Speech Recognition to Speech and Language Development in Young Children](#) *Martin Russell, Catherine Brown, Adrian Skilling, Rob Series, Julie Wallace, Bill Bohnam, Paul Barker*
8. [Sub-band Adaptive Speech Enhancement for Hearing Aids](#) *D. R. Campbell*
9. [Adapting a TTS System to a Reading Machine for the Blind](#) *Thomas Portele, Juergen Kraemer*

ThA2S1 -- Dialogue Special Session I

Chairs: James R. Glass, MIT Laboratory for Computer Science; and Yasunaga Niimi, Kyoto Institute of Technology

1. [Modeling of Spoken Dialogue with and without Visual Information](#) Katsuhiko Shirai
 2. [Multimodal Discourse Modelling in a Multi-user Multi-domain Environment](#) Stephanie Seneff, David Goddeau, Christine Pao, Joseph Polifroni
 3. [Automatic Acquisition of Probabilistic Dialogue Models](#) Kenji Kita, Yoshikazu Fukui, Masaaki Nagata, Tsuyoshi Morimoto
 4. [Units of Dialogue Management: An Example](#) Paul Heisterkamp, Scott McGlashan
 5. [Error Resolution During Multimodal Human-computer Interaction](#) Sharon Oviatt, Robert VanGent
 6. [Improved Spontaneous Dialogue Recognition Using Dialogue and Utterance Triggers by Adaptive Probability Boosting](#) Ramesh R. Sarukkai, Dana H. Ballard
 7. [Speech Recognition for Spontaneously Spoken German Dialogues](#) Kai Hübener, Uwe Jost, Henrik Heine
 8. [Using Prosodic Information to Constrain Language Models for Spoken Dialogue](#) Paul Taylor, Hiroshi Shimodaira, Stephen Isard, Simon King, Jacqueline Kowtko
-
-

ThP1L1 -- Language Modeling I

Chair: Roberto Pieraccini, AT&T Labs - Research

1. [Combination of Word-based and Category-based Language Models](#) T.R. Niesler, P.C. Woodland
 2. [A Multi-level Lexical-semantics Based Language Model Design for Guided Integrated Continuous Speech Recognition](#) Francisco J. Valverde-Albacete, Jose M. Pardo
 3. [A Category Based Approach for Recognition of Out-of-Vocabulary Words](#) Florian Gallwitz, Elmar Noeth, Heinrich Niemann
 4. [Scalable Backoff Language Models](#) Kristie Seymore, Ronald Rosenfeld
 5. [Modeling Long Distance Dependence in Language: Topic Mixtures vs. Dynamic Cache Models](#) R. Iyer, Mari Ostendorf
 6. [Bayesian Estimation Methods for N-Gram Language Model Adaptation](#) Marcello Federico
-
-

ThP1L2 -- Feature Extraction for Speech Recognition I

Chair: Shubha Kadambe, Atlantic Aerospace Electronics Corp.

1. [Feature Dimension Reduction Using Reduced-Rank Maximum Likelihood Estimation for Hidden Markov Models](#) Don X. Sun
 2. [Using Multi-Level Segmentation Coefficients to Improve HMM Speech Recognition](#) Kai Hübener
 3. [A Comparative Study of Linear Feature Transformation Techniques for Automatic Speech Recognition](#) T. Eisele, R. Haeb-Umbach, D. Langmann
 4. [Inclusion of Temporal Information into Features for Speech Recognition](#) Ben Milner
 5. [New Cepstral Representation using Wavelet Analysis and Spectral Transformation for Robust Speech Recognition](#) Hubert Wassner, Gérard Chollet
 6. [Wavelet Based Feature Extraction for Phoneme Recognition](#) C.J. Long, S. Datta
-
-

ThP1L3 -- Speech Production - Measurement and Modeling

Chair: Terrance M. Neary, University of Alberta

1. [Extraction of Tongue Contours in X-ray Images with Minimal User Interaction](#) Yves Laprie, Marie-Odile Berger
2. [Three-dimensional Measurement of the Vocal Tract by MRI](#) Didier Demolin, Thierry Metens, Alain Soquet
3. [Syllable Affiliation of Final Consonant Clusters Undergoes a Phase Transition Over Speaking Rates](#) Philip Gleason, Betty Tuller, J. A. Scott Kelso

4. [Towards a Biomechanical Model of the Larynx](#) *Arthur Lobo, Michael O'Malley*
5. [Effects of Auditory Feedback on F0 Trajectory Generation](#) *Hideki Kawahara, Hiroko Kato, J. C. Williams*

ThP1P1 -- Speech Coding / HMMs and NNs in ASR

Chair: *Jean-Luc Gauvain, LIMSI-CNRS*

1. [On the Effects of Accent and Language on Low Rate Speech Coders](#) *I. S. Burnett, J. J. Parry*
2. [VQ Codevector Index Assignment Using Genetic Algorithms for Noisy Channels](#) *J.S. Pan, Fergus R. McInnes, Mervyn A. Jack*
3. [An Improved Vector Quantization Algorithm for Speech Transmission Over Noisy Channels](#) *Gavin C. Cawley*
4. [Very Low Delay and High Quality Coding of 20 Hz-15 kHz Speech Signals at 64 kbit/s](#) *C. Murgia, G. Feng, A. Le Guyader, C. Quinquis*
5. [Application of Speaker Modification Techniques to Phonetic Vocoding](#) *Carlos M. Ribeiro, Isabel M. Trancoso*
6. [Entropy Coded Vector Quantization with Hidden Markov Models](#) *Tadashi Yonezaki, Kiyohiro Shikano*
7. [An Application of Recurrent Neural Networks to Low Bit Rate Speech Coding](#) *Minoru Kohata*
8. [CELP Coding System Based on Mel-Generalized Cepstral Analysis](#) *Kazuhito Koishida, Keiichi Tokuda, Takao Kobayashi, Satoshi Imai*
9. [Wideband Re-synthesis of Narrowband CELP-coded Speech Using Multiband Excitation Model](#) *Cheung-Fat Chan, Wai-Kwong Hui*
10. [Recurrent Neural Networks for Phoneme Recognition](#) *Takuya Koizumi, Mikio Mori, Shuji Taniguchi, Mitsutoshi Maruya*
11. [A Model for the Acoustic Phonetic Structure of Arabic Language using a Single Ergodic Hidden Markov Model](#) *M.A. Mokhtar, A. Zein-el-Abddin*
12. [Modelling Long Term Variability Information in Mixture Stochastic Trajectory Framework](#) *Yifan Gong, Irina Illina, Jean-Paul Haton*
13. [Segmental Phonetic Features Recognition by means of Neural-fuzzy Networks and Integration in an N-best Solutions Post-processing](#) *T. Moudenc, R. Sokol, G. Mercier*
14. [Stochastic Trajectory Model with State-Mixture for Continuous Speech Recognition](#) *Irina Illina, Yifan Gong*
15. [Recognition of Spelled Names over the Telephone](#) *Hermann Hild, Alex Waibel*
16. [Optimal Tying of HMM Mixture Densities using Decision Trees](#) *Gilles Boulianne, Patrick Kenny*
17. [Speech Recognition Using an Enhanced FVQ Based on a Codeword Dependent Distribution Normalization and Codeword Weighting by Fuzzy Objective Function](#) *Hwan Jin Choi, Yung Hwan Oh*
18. [Using the Self-Organizing Map to Speed up the Probability Density Estimation for Speech Recognition with Mixture Density HMMs](#) *Mikko Kurimo, Panu Somervuo*

ThP1S1 -- Dialogue Special Session II

Chairs: *Patti Price, SRI International; and Akira Kurematsu, University of Electro-Communications*

1. [Combining the Detection and Correction of Speech Repairs](#) *Peter A. Heeman, Kyung-ho Loken-Kim, James F. Allen*
2. [Generating Spontaneous Elliptical Utterance](#) *Yuji Sagawa, Wataru Sugimoto, Noboru Ohnishi*
3. [Developing the Modelling of Swedish Prosody in Spontaneous Dialogue](#) *Gösta Bruce, Marcus Filipsson, Johan Frid, Björn Granström, Kjell Gustafson, Merle Horne, David House, Birgitta Lastow, Paul Touati*
4. [Spoken Language Generation in a Multimedia System](#) *Shimei Pan, Kathleen R. McKeown*
5. [Synthesizing Dialogue Speech of Japanese Based on the Quantitative Analysis of Prosodic Features](#) *Keiichi Hirose, Mayumi Sakata, Hiromichi Kawanami*
6. [Spoken Dialogue Interface in a Dual Task Situation](#) *Shuichi Tanaka, Shu Nakazato, Keiichiro Hoashi, Katsuhiko Shirai*

ThP1S2 -- Neural Models of Speech Processing I

Chair: *Eric D. Young, Johns Hopkins University*

1. [How is Information About Speech Encoded in the Peripheral Auditory System?](#) *Eric D. Young*
 2. [Spectral Shape Analysis in the Central Auditory System](#) *Shihab Shamma*
-
-

ThP2L1 -- Language Modeling II

Chair: *Jerome R. Bellegarda, Apple Computer, Inc.*

1. [Modeling Disfluencies in Conversational Speech](#) *Man-hung Siu, Mari Ostendorf*
 2. [Evaluation of a Language Model using a Clustered Model Backoff](#) *John Miller, Fil Alleva*
 3. [Language Modeling Using X-grams](#) *Antonio Bonafonte, José B. Mariño*
 4. [Class Phrase Models For Language Modelling](#) *Klaus Ries, Finn Dag Buo, Alex Waibel*
 5. [Introducing Linguistic Constraints into Statistical Language Modeling](#) *Petra Geutner*
 6. [Language Modeling with Stochastic Automata](#) *Jianying Hu, William Turin, Michael K. Brown*
-
-

ThP2L2 -- Feature Extraction for Speech Recognition II

Chair: *Shubha Kadambe, Atlantic Aerospace Electronics Corp.*

1. [New Fast Wavelet Packet Transform Algorithms for Frame Synchronized Speech Processing](#) *Andrzej Drygajlo*
 2. [Frequency-Warping in Speech](#) *S. Umesh, L. Cohen, N. Marinovic, D. Nelson*
 3. [Extracting Speech Features from Human Speech-like Noise](#) *Daisuke Kobayashi, Shoji Kajita, Kazuya Takeda, Fumitada Itakura*
 4. [Subband-Crosscorrelation Analysis for Robust Speech Recognition](#) *Shoji Kajita, Kazuya Takeda, Fumitada Itakura*
 5. [A New ASR Approach Based on Independent Processing and Recombination of Partial Frequency Bands](#) *Hervé Bourlard, Stéphane Dupont*
 6. [Frequency and Time Filtering of Filter-bank Energies for HMM Speech Recognition](#) *Climent Nadeu, José B. Mariño, Javier Hernando, Albino Nogueiras*
-
-

ThP2L3 -- Vowels

Chair: *John Ohala, University of California, Berkeley*

1. [Temporal Cues for Vowels and Universals of Vowel Inventories](#) *Carrie E. Lang, John J. Ohala*
 2. [Acoustic Variability in Spontaneous Conversational Speech of American English Talkers](#) *Ann K. Syrdal*
 3. [Cross-language Speech Perception: Swedish, English, and Spanish Speakers' Perception of Front Rounded Vowels](#) *Raquel Willerman, Patricia K. Kuhl*
 4. [Inter-language Vowel Perception and Production by Korean and Japanese Listeners](#) *John C.L. Ingram, See-Gyoon Park*
 5. [Intelligibility and Acoustic Correlates of Japanese Accented English Vowels](#) *Diane Kewley-Port, Reiko Akahane-Yamada, Kiyooki Aikawa*
 6. [Segmentation Strategies for Spoken Language Recognition: Evidence from Semi-bilingual Japanese Speakers of English](#) *Kiyoko Yoneyama*
-
-

ThP2P1 -- NNs and Stochastic Modeling

Chair: *Wu Chou, Bell Labs - Lucent Technologies*

1. [Integrating Connectionist, Statistical and Symbolic Approaches for Continuous Spoken Korean Processing](#) *Geunbae Lee,*

Jong-Hyeok Lee, Kyubong Park, Byung-Chang Kim

2. [Towards ASR on Partially Corrupted Speech](#) *Hynek Hermansky, Sangita Timberwala, Misha Pavel*
3. [Parametric Trajectory Models for Speech Recognition](#) *Herbert Gish, Kenney Ng*
4. [Use of Gaussian Selection in Large Vocabulary Continuous Speech Recognition Using HMMs](#) *K.M. Knill, M.J.F. Gales, S. J. Young*
5. [Cross Phone State Clustering using Lexical Stress and Context](#) *J. Hogberg, K. Sjolander*
6. [Likelihood Ratio Decoding and Confidence Measures for Continuous Speech Recognition](#) *Eduardo Lleida, Richard C. Rose*
7. [A Study on Continuous Chinese Speech Recognition Based on Stochastic Trajectory Models](#) *Xiaohui Ma, Yifan Gong, Yuqing Fu, Jiren Lu, Jean-Paul Haton*
8. [A Proposal for a New Algorithm of Reference Interval-free Continuous DP for Real-time Speech or Text Retrieval](#) *Yoshiaki Itoh, Jiro Kiyama, Hiroshi Kojima, Susumu Seki, Ryuichi Oka*
9. [Language Modeling by String Pattern N-gram for Japanese Speech Recognition](#) *Akinori Ito, Masaki Kohda*
10. [Statistical Language Modeling using a Variable Context Length](#) *Reinhard Kneser*
11. [A Comparison of Hybrid HMM Architectures Using Global Discriminative Training](#) *Finn Tore Johansen*
12. [Improved Probability Estimation with Neural Network Models](#) *Wei Wei, Etienne Barnard, Mark Fanty*
13. [A Neural Network Using Acoustic Sub-word Units for Continuous Speech Recognition](#) *Ha-Jin Yu, Yung-Hwan Oh*
14. [On the Error Criteria in Neural Networks as a Tool for Human Classification Modelling](#) *Louis F. M. ten Bosch, Roel Smits*
15. [A Non-linear Filtering Approach to Stochastic Training of the Articulatory-acoustic Mapping Using the EM Algorithm](#) *Gordon Ramsay*
16. [A Tool for Automated Design of Language Models](#) *Y.P. Yang, J.R. Deller Jr.*
17. [Acoustic-phonetic Decoding Based on Elman Predictive Neural Networks](#) *F. Freitag, E. Monte*
18. [On Improving Discrimination Capability of an RNN Based Recognizer](#) *Tan Lee, P.C. Ching*
19. [An Evaluation of Statistical Language Modeling for Speech Recognition using a Mixed Category of Both Words and Parts-of-speech](#) *Yumi Wakita, Jun Kawai, Hitoshi Iida*

ThP2S1 -- Dialogue Special Session III

Chairs: Paul Dalsgaard, Aalborg University; and Hiroya Fujisaki, Science University of Tokyo

1. [A Dialogue Control Strategy Based on the Reliability of Speech Recognition](#) *Yasuhisa Niimi, Yutaka Kobayashi*
 2. [SpeechWear: A Mobile Speech System](#) *Alexander I. Rudnicky, Stephen Reed, Eric H. Thayer*
 3. [WHEELS: A Conversational System in the Automobile Classifieds Domain](#) *Helen Meng, Senis Busayapongchai, James Glass, David Goddeau, Lee Hetherington, Edward Hurley, Christine Pao, Joseph Polifroni, Stephanie Seneff, Victor Zue*
 4. [Effective Human-computer Cooperative Spoken Dialogue: The AGS Demonstrator](#) *M.D. Sadek, A. Ferrieux, A. Cozannet, P. Bretier, F. Panaget, J. Simonin*
 5. [Dialog in the RAILTEL Telephone-based System](#) *S.K. Bennacef, L. Devillers, S. Rosset, Lori Lamel*
 6. [Dialogue Processing in a Conversational Speech Translation System](#) *Alon Lavie, Lori Levin, Yan Qu, Alex Waibel, Donna Gates, Marsal Gavaldà, Laura Mayfield, Maite Taboada*
-
-

ThP2S2 -- Neural Models of Speech Processing II

Chair: Eric D. Young, Johns Hopkins University

1. [Novel Speech Processing Mechanism Derived from Auditory Neocortical Circuit Analysis](#) *Boris Aleksandrovsky, James Whitson, Gretchen Andes, Gary Lynch, Richard Granger*
2. [Modeling Neurons in the Anteroventral Cochlear Nucleus for Amplitude Modulation \(AM\) Processing: Application to Speech Sound](#) *Ping Tang, Jean Rouat*
3. [Noise Suppression and Loudness Normalization in an Auditory Model-based Acoustic Front-end](#) *Halewijn Vereecken, Jean-Pierre Martens*
4. [A Psychoacoustic Model for the Noise Masking of Voiceless Plosive Bursts](#) *Jim Hant, Brian Strobe, Abeer Alwan*
5. [Training Machine Classifiers to Match the Performance of Human Listeners in a Natural Vowel Classification Task](#) *Martin Hunke, Thomas Holton*
6. [A Neural Matrix Model for Active Tracking of Frequency-modulated Tones](#) *Kiyooki Aikawa, Hideki Kawahara, Minoru Tsuzaki*
