## FrA1L1 -- Utterance Verification and Word Spotting

Chair: Jay Wilpon, AT&T Labs - Research

---

---

1. [A User-Configurable System for Voice Label Recognition](#) Richard C. Rose, Eduardo Lleida, G.W. Erhart, R.V. Grubbe
  2. [Keyword Spotting Enhancement for Video Soundtrack Indexing](#) Philippe Gelin, Chris. J. Wellekens
  3. [New Efficient Fillers for Unlimited Word Recognition and Keyword Spotting](#) Rachida El Méliani, Douglas O'Shaughnessy
  4. [Automatic Transcription of General Audio Data: Preliminary Analyses](#) Michelle S. Spina, Victor Zue
  5. [Transcribing Radio News](#) Francis Kubala, Tasos Anastasakos, Hubert Jin, Long Nguyen, Richard Schwartz
  6. [Correcting Recognition Errors via Discriminative Utterance Verification](#) Anand R. Setlur, Rafid A. Sukkar, John Jacob
- 
- 

## FrA1L2 -- Acquisition/Learning Training L2 Learners

Chair: Grace H. Yeni-Komshian, University of Maryland

---

---

1. [Does Training in Speech Perception Modify Speech Production?](#) Reiko Akahane-Yamada, Yoh'ichi Tohkura, Ann R. Bradlow, David B. Pisoni
  2. [Phrase-Final Lengthening and Stress-Timed Shortening in the Speech of Native Speakers and Japanese Learners of English](#) Motoko Ueyama
  3. [Japanese Accentuations by Foreign Students and Japanese Speakers of Non-Tokyo Dialect](#) Nobuko Yamada
  4. [Devoicing of Japanese Vowels by Taiwanese Learners of Japanese](#) J. Kevin Varden, Tsutomu Sato
  5. [Fluency and Use of Segmental Dialect Features in the Acquisition of a Second Language \(French\) by English Speakers](#) Danièle Archambault, Catherine Foucher, Blagovesta Maneva
  6. [Estimating Child and Adolescent Formant Frequency Values From Adult Data](#) P. Martland, S.P. Whiteside, Steve W. Beet, L. Baghai-Ravary
- 
- 

## FrA1L3 -- Focus, Stress and Accent

Chair: Elizabeth Shriberg, SRI International

---

---

1. [Acoustic Correlates of Linguistic Stress and Accent in Dutch and American English](#) Agaath M.C. Sluijter, Vincent J. van Heuven
  2. [On the Levels of Accentuation in Spoken Japanese](#) Hiroya Fujisaki, Sumio Ohno, Osamu Tomita
  3. [Tonal Distinctions Between Emphatic Stress and Pretonic Lengthening in Quebec French](#) Linda Thibault, Marise Ouellet
  4. [Distinction Between 'Normal' Focus and 'Contrastive/Emphatic' Focus](#) Anja (Petzold) Elsner
  5. [Perception of Tonal Accent by Americans Learning Japanese](#) Yukihiro Nishinuma, Masako Arai, Takako Ayusawa
  6. [Modeling Intra-Speaker Pitch Range Variation: Predicting F0 Targets when "Speaking Up"](#) Elizabeth Shriberg, D. Robert Ladd, Jacques Terken
- 
- 

## FrA1P1 -- Spoken Language Dialogue and Conversation

Chair: Alicia Abella, AT&T Labs - Research

---

---

1. [Predicting Dialogue Acts for a Speech-To-Speech Translation System](#) *Norbert Reithinger, Ralf Engel, Michael Kipp, Martin Klesen*
2. [Automatic Speech Translation Based on the Semantic Structure](#) *Johannes Müller, Holger Stahl, Manfred Lang*
3. [A Methodology for Application Development for Spoken Language Systems](#) *Lewis M. Norton, Carl E. Weir, K.W. Scholz, Deborah A. Dahl, Ahmed Bouzid*
4. [A New Restaurant Guide Conversational System: Issues in Rapid Prototyping for Specialized Domains](#) *Stephanie Seneff, Joseph Polifroni*
5. [Semantic Interpretation of a Japanese Complex Sentence in an Advisory Dialogue - Focused on the Postpositional Word "KEDO," Which Works as a Conjunction Between Clauses](#) *Tadahiko Kumamoto, Akira Ito*
6. [A Korean Morphological Analyzer for Speech Translation System](#) *Youngkuk Hong, Myoung-Wan Koo, Gijoo Yang*
7. [Generic and Domain-specific Aspects of the Waxholm NLP and Dialog Modules](#) *Rolf Carlson, Sheri Hunnicutt*
8. [A Real-Time System for Summarizing Human-Human Spontaneous Spoken Dialogues](#) *Megumi Kameyama, Goh Kawai, Isao Arima*
9. [Evaluation of Spoken Language Understanding and Dialogue Systems](#) *Bernd Hildebrandt, Heike Rautenstrauch, Gerhard Sagerer*
10. [Inter-Speaker Interaction of F0 in Dialogs](#) *Kuniko Kakita*
11. [A Robust Dialogue System for Making an Appointment](#) *Hans Brandt-Pook, Gernot A. Fink, Bernd Hildebrandt, Franz Kummert, Gerhard Sagerer*
12. [Segmentation of Spoken Dialogue by Interjections, Disfluent Utterances and Pauses](#) *Kazuyuki Takagi, Shuichi Itahashi*
13. [A Form-Based Dialogue Manager for Spoken Language Applications](#) *David Goddeau, Helen Meng, Joe Polifroni, Stephanie Seneff, Senis Busayapongchai*
14. [The Design of Complex Telephony Applications Using Large Vocabulary Speech Technology](#) *S.J. Whittaker, D.J. Attwater*
15. [Building 10,000 Spoken Dialogue Systems](#) *Stephen Sutton, David G. Novick, Ronald A. Cole, Pieter Vermeulen, Jacques de Villiers, Johan Schalkwyk, Mark Fanty*
16. [Speaker Intention Modeling for Large Vocabulary Mandarin Spoken Dialogues](#) *Yen-Ju Yang, Lee-Feng Chien, Lin-Shan Lee*
17. [Hybrid Language Models and Spontaneous Legal Discourse](#) *P.E. Kenne, Mary O'Kane*
18. [Topic Change and Local Perplexity in Spoken Legal Dialogue](#) *P.E. Kenne, Mary O'Kane*
19. [Intonational Cues to Discourse Structure in Japanese](#) *Jennifer J. Venditti, Marc Swerts*
20. [Principles for the Design of Cooperative Spoken Human-Machine Dialogue](#) *Niels Ole Bernsen, Hans Dybkjær, Laila Dybkjær*
21. [Development and Comparison of Three Syllable Stress Classifiers](#) *Karen L. Jenkin, Michael S. Scordilis*

## FrA1P2 -- Speech Disorders

Chair: Don Jamieson, University of Western Ontario

1. [Interaction of Speech Disorders with Speech Coders: Effects on Speech Intelligibility](#) *D.G. Jamieson, Li Deng, M. Price, Vijay Parsa, J. Till*
2. [Detecting Arytenoid Cartilage Misplacement through Acoustic and Electroglottographic Jitter Analysis](#) *Maurílio N. Vieira, Arnold G. D. Maran, Fergus R. McInnes, Mervyn A. Jack*
3. [Robust F0 and Jitter Estimation in Pathological Voices](#) *Maurílio N. Vieira, Fergus R. McInnes, Mervyn A. Jack*
4. [Speech Monitoring of Infective Laryngitis](#) *F. Plante, H. Kessler, B.M.G. Cheetham, J. Earis*
5. [Searching for Nonlinear Relations in Whitened Jitter Time Series](#) *J. Schoentgen, R. De Guchteneere*
6. [Vocal Fold Pathology Assessment using AM Autocorrelation Analysis of the Teager Energy Operator](#) *Liliana Gavidia-Ceballos, John H.L. Hansen, James F. Kaiser*
7. [Continuous Positive Airway Pressure \(CPAP\) in the Treatment of Hypernasality](#) *David P. Kuehn*
8. [Enhancement of Alaryngeal Speech by Adaptive Filtering](#) *Carol Y. Espy-Wilson, Venkatesh R. Chari, Caroline B. Huang*
9. [Simulation of Disordered Speech Using a Frequency-Domain Vocal Tract Model](#) *Li Deng, Xuemin Shen, D.G. Jamieson, J. Till*
10. [A Stochastic Model of Fundamental Period Perturbation and Its Application to Perception of Pathological Voice Quality](#) *Yasuo Endo, Hideki Kasuya*
11. [A Screening Test for Speech Pathology Assessment Using Objective Quality Measures](#) *Eric J. Wallen, John H.L. Hansen*
12. [Recent Advances in Hypernasal Speech Detection using the Nonlinear Teager Energy Operator](#) *Douglas A. Cairns, John H.L. Hansen, James F. Kaiser*

## FrA1S1 -- Vocal Tract Geometry I

Chair: Maureen Stone, University of Maryland at Baltimore

1. [Human Palate and Related Structures: Their Articulatory Consequences](#) Kiyoshi Honda, Shinji Maeda, Michiko Hashi, Jim Dembowski, John R. Westbury
  2. [A Continuum Mechanics Representation of Tongue Deformation](#) Edward P. Davis, Andrew Douglas, Maureen Stone
  3. [From MRI and Acoustic Data to Articulatory Synthesis: A Case Study of the Lateral Approximants in American English](#) Philbert Bangayan, Abeer Alwan, Shrikanth Narayanan
  4. [Liquids in Tamil](#) Shrikanth Narayanan, Abigail Kaun, Dani Byrd, Peter Ladefoged, Abeer Alwan
- 
- 

## FrA2L1 -- Prosody in ASR and Segmentation

Chair: Keikichi Hirose, University of Tokyo

---

---

1. [Modeling Hyperarticulate Speech during Human-computer Error Resolution](#) Sharon Oviatt, Gina-Anne Levow, Margaret MacEachern, Karen Kuhn
  2. [Using Stress to Disambiguate Spoken Thai Sentences Containing Syntactic Ambiguity](#) Siripong Potisuk, Mary P. Harper, Jackson T. Gandour
  3. [Use of Prosodic Information to Integrate Acoustic and Linguistic Knowledge in Continuous Mandarin Speech Recognition with Very Large Vocabulary](#) Hung-yun Hsieh, Ren-yuan Lyu, Lin-shan Lee
  4. [Word Boundary Detection using Pitch Variations](#) G.V. Ramana Rao, J. Srichand
  5. [Detection of Phrase Boundaries in Japanese by Low-Pass Filtering of Fundamental Frequency Contours](#) Atsuhiko Sakurai, Keikichi Hirose
  6. [A New Method for Speech Delexicalization, and its Application to the Perception of French Prosody](#) V. Pagel, N. Carbonell, Yves Laprie
- 
- 

## FrA2L2 -- Acquisition and Learning by Machine

Chair: Allen L. Gorin, AT&T Labs - Research

---

---

1. [Task Adaptation for Dialogues Via Telephone Lines](#) Udo Bub
  2. [The Influence of Bigram Constraints on Word Recognition by Humans: Implications for Computer Speech Recognition](#) Ronald A. Cole, Yonghong Yan, Troy Bailey
  3. [ALICE: Acquisition of Language In Conversational Environment - An Approach to Weakly Supervised Training of Spoken Language System for Language Porting](#) Tetsunori Kobayashi
  4. [Pitch Pattern Clustering of User Utterances in Human-Machine Dialogue](#) Takashi Yoshimura, Satoru Hayamizu, Hiroshi Ohmura, Kazuyo Tanaka
  5. [Simplifying Language through Error-correcting Decoding](#) J.C. Amengual, E. Vidal, J.M. Benedi
  6. [A Mixed Approach to Speech Understanding](#) Mauro Cettolo, Anna Corazza, Renato De Mori
- 
- 

## FrA2L3 -- Dialogue Systems

Chair: Esther Levin, AT&T Labs - Research

---

---

1. [Speech Recognition for an Information Kiosk](#) J.L. Gauvain, J.J. Gangolf, L. Lamel
2. [Localizing an Automatic Inquiry System for Public Transport Information](#) Helmer Strik, Albert Russel, Henk van den Heuvel, Catia Cucchiarini, Louis Boves
3. [Prompt Constrained Natural Language - Evolving the Next Generation of Telephony Services](#) Stephen M. Marcus, Deborah W. Brown, Randy G. Goldberg, Max S. Schoeffler, William R. Wetzell, Richard R. Rosinski
4. [Key-Phrase Detection and Verification for Flexible Speech Understanding](#) Tatsuya Kawahara, Chin-Hui Lee, Biing-Hwang Juang
5. [Interactive Recovery from Speech Recognition Errors in Speech User Interfaces](#) Bernhard Suhm, Brad Myers, Alex Waibel
6. [Estimation of Language Models for New Spoken Language Applications](#) Sunil Issar

---

---

## FrA2P1 -- Speech Enhancement and Robust Processing

Chair: Richard Stern, Carnegie Mellon University

---

---

1. [H-infinity Filtering for Speech Enhancement](#) Xuemin Shen, Li Deng, Anisa Yasmin
  2. [A Comparative Analysis of Channel-Robust Features and Channel Equalization Methods for Speech Recognition](#) Saeed V. Vaseghi, Ben Milner
  3. [Robust Speech Recognition Features Based on Temporal Trajectory Filtering of Frequency Band Spectrum](#) Jia-lin Shen, Wen-liang Hwang, Lin-shan Lee
  4. [Durational Modelling for Improved Connected Digit Recognition](#) Kevin Power
  5. [Study on the Dereverberation of Speech Based on Temporal Envelope Filtering](#) Carlos Avendano, Hynek Hermansky
  6. [Estimating Markov Model Structures](#) Thorsten Brants
  7. [A Fertility Channel Model for Post-Correction of Continuous Speech Recognition](#) Eric K. Ringger, James F. Allen
  8. [Restoration of Wide Band Signal from Telephone Speech using Linear Prediction Error Processing](#) Hiroshi Yasukawa
  9. [Smoothed Spectral Subtraction for a Frequency-Weighted HMM in Noisy Speech Recognition](#) Hiroshi Matsumoto, Noboru Naitoh
  10. [A Simple Architecture for using Multiple Cues in Sound Separation](#) William S. Woods, Martin Hansen, Thomas Wittkop, Birger Kollmeier
  11. [On the Robust Automatic Segmentation of Spontaneous Speech](#) Bojan Petek, Ove Andersen, Paul Dalsgaard
  12. [Bayesian Adaptation of Speech Recognizers to Field Speech Data](#) C.G. Miglietta, C. Mokbel, D. Jouvet, J. Monné
  13. [Sub-band Adaptive Filtering Applied to Speech Enhancement](#) A. J. Darlington, D. J. Campbell
  14. [Noise Robust Estimate of Speech Dynamics for Speaker Recognition](#) J.P. Openshaw, John S. Mason
  15. [Overview of Speech Enhancement Techniques for Automatic Speaker Recognition](#) Javier Ortega-García, Joaquín González-Rodríguez
  16. [Dynamic Features for Segmental Speech Recognition](#) Naomi Harte, Saeed V. Vaseghi, Ben Milner
  17. [Speech Recognition Based on a Model of Human Auditory System](#) Takuya Koizumi, Mikio Mori, Shuji Taniguchi
  18. [APVQ Encoder Applied to Wideband Speech Coding](#) J.M. Salavedra, E. Masgrau
  19. [Simple Fast Vector Quantization of the Line Spectral Frequencies](#) Jin Zhou, Yair Shoham, Ali Akansu
- 
- 

## FrA2S1 -- Vocal Tract Geometry II

Chair: Maureen Stone, University of Maryland at Baltimore

---

---

1. [Speaker Individualities of Vocal Tract Shapes of Japanese Vowels Measured by Magnetic Resonance Images](#) Chang-Sheng Yang, Hideki Kasuya
  2. [Vocal Tract Acoustics Using the Transmission Line Matrix \(TLM\) Method](#) S. El-Masri, X. Pelorson, P. Saguet, P. Badin
  3. [Building Sensori-motor Prototypes from Audiovisual Exemplars](#) Gérard Bailly
  4. [Parameterized VT Area Function Inversion](#) Mats Båvegård, Gunnar Fant
  5. [An Improved Vocal Tract Model of Vowel Production Implementing Piriform Resonance and Transvelar Nasal Coupling](#) Jianwu Dang, Kiyoshi Honda
  6. [Pseudo-articulatory Speech Synthesis for Recognition using Automatic Feature Extraction from X-Ray Data](#) C. S. Blackburn, S. J. Young
- 
- 

## FrP1L1 -- Speaker Adaptation and Normalization I

Chair: Chin-Hui Lee, Bell Labs - Lucent Technologies

---

---

1. [N-best-based Instantaneous Speaker Adaptation Method for Speech Recognition](#) Tomoko Matsui, Sadaoki Furui
2. [Mixture Splitting Technic and Temporal Control in a HMM-based Recognition System](#) C. Montacié, M.-J. Caraty, C. Barras
3. [A Unified Spectral Transformation Adaptation Approach for Robust Speech Recognition](#) Lei Yao, Dong Yu, Taiyi Huang

4. [On-line Adaptive Learning of the Correlated Continuous Density Hidden Markov Models for Speech Recognition](#) *Qiang Huo, Chin-Hui Lee*
  5. [Speaker Adaptation by Modeling the Speaker Variation in a Continuous Speech Recognition System](#) *Nikko Ström*
  6. [An Enquiring System of Unknown Words in TV News by Spontaneous Repetition \(Application of Speaker Normalization by Speaker Subspace Projection\)](#) *Yasuo Ariki, Shigeaki Tagashira*
- 
- 

## FrP1L2 -- Spoken Language and NLP I

Chair: *Adam L. Buchsbaum, AT&T Labs - Research*

---

---

1. [Language Understanding using Hidden Understanding Models](#) *Richard Schwartz, Scott Miller, David Stallard, John Makhoul*
  2. [Processing of Semantic Information in Fluently Spoken Language](#) *Allen L. Gorin*
  3. [Automatic Linguistic Segmentation of Conversational Speech](#) *Andreas Stolcke, Elizabeth Shriberg*
  4. [Towards Understanding Spontaneous Speech: Word Accuracy vs. Concept Accuracy](#) *M. Boros, W. Eckert, Florian Gallwitz, G. Görz, G. Hanrieder, Heinrich Niemann*
  5. [A Stochastic Case Frame Approach for Natural Language Understanding](#) *Wolfgang Minker, S.K. Bennacef, J.L. Gauvain*
  6. [Improving Speech Understanding by Incorporating Database Constraints and Dialogue History](#) *Frank Seide, Bernhard Rüber, Andreas Kellner*
- 
- 

## FrP1L3 -- Spoken Discourse Analysis/Synthesis

Chair: *Jan P. van Santen, Bell Labs - Lucent Technologies*

---

---

1. [A New Discourse Structure Model for Spontaneous Spoken Dialogue](#) *Tetsuro Chino, Hiroyuki Tsuboi*
  2. [An Architecture for Spoken Dialogue Management](#) *David Duff, Barbara Gates, Susann LuperFoy*
  3. [Pausing Strategies in Discourse in Dutch](#) *Monique E. van Donzel, Florian J. Koopmans-van Beinum*
  4. [Filled Pauses as Markers of Discourse Structure](#) *Marc Swerts, Anne Wichmann, Robbert-Jan Beun*
  5. [The Prosodic Analysis of Korean Dialogue Speech - Through a Comparative Study with Read Speech](#) *Cheol-jae Seong, Minsoo Hahn*
  6. [Changing the Topic: How Long Does it Take?](#) *Mary O'Kane, P.E. Kenne*
- 
- 

## FrP1P1 -- Acoustic Modeling I

Chair: *Ilija Zeljkovic, AT&T Labs - Research*

---

---

1. [Learning Pronunciation Dictionary from Speech Data](#) *Christian-Michael Westendorf, Jens Jelitto*
2. [The Trended HMM with Discriminative Training for Phonetic Classification](#) *C. Rathinavelu, Li Deng*
3. [Improving Decision Trees for Acoustic Modeling](#) *Ariane Lazaridès, Yves Normandin, Roland Kuhn*
4. [An Improved Training Algorithm in HMM-based Speech Recognition](#) *Gongjun Li, Taiyi Huang*
5. [Speech Recognition Using a Strong Correlation Assumption for the Instantaneous Spectra](#) *J. Ming, P. O'Boyle, J. McMahon, F. J. Smith*
6. [On Parameter Filtering in Continuous Subword-unit-based Speech Recognition](#) *Pau Pachès-Leal, Climent Nadeu*
7. [Estimation of Statistical Phoneme Center Considering Phonemic Environments](#) *Shigeaki Okawa, Katsuhiko Shirai*
8. [Integration of Context-dependent Durational Knowledge into HMM-based Speech Recognition](#) *Xue Wang, Louis F. M. ten Bosch, Louis C. W. Pols*
9. [Speech Recognition Based on Acoustically Derived Segment Units](#) *T. Fukada, M. Bacchiani, K.K. Paliwal, Yoshinori Sagisaka*
10. [Robust Gender-dependent Acoustic-phonetic Modelling in Continuous Speech Recognition Based on a New Automatic Male/Female Classification](#) *Rivarol Vergin, Azarshid Farhat, Douglas O'Shaughnessy*
11. [A Codebook Adaptation Algorithm for SCHMM Using Formant Distribution](#) *Tae Young Yang, Won Ho Shin, Weon Goo Kim, Dae Hee Youn*
12. [Parameter Tying for Flexible Speech Recognition](#) *J. Simonin, S. Bodin, D. Jouvet, K. Bartkova*

13. [Word-spotting Based on Inter-word and Intra-word Diphone Models](#) Tsuneo Nitta, Shin'ichi Tanaka, Yasuyuki Masai, Hiroshi Matsu'ura
  14. [Duration Modeling with Expanded HMM Applied to Speech Recognition](#) Antonio Bonafonte, Josep Vidal, Albino Nogueiras
  15. [Different Strategies for Distribution Clustering using Discrete, Semicontinuous and Continuous HMMs in CSR](#) Ricardo de Córdoba, José M. Pardo
  16. [Improved HMM Phone and Triphone Models for Realtime ASR Telephony Applications](#) Ilija Zeljkovic, Shrikanth Narayanan
  17. [Improved Extended HMM Composition by Incorporating Power Variance](#) Yasuhiro Minami, Sadaoki Furui
  18. [Optimal Filtering and Smoothing for Speech Recognition using a Stochastic Target Model](#) Gordon Ramsay, Li Deng
  19. [Speech Recognition Using Syllable-Like Units](#) Zhihong Hu, Johan Schalkwyk, Etienne Barnard, Ronald A. Cole
- 
- 

## FrP1S1 -- Physics and Simulation of the Vocal Tract I

Chairs: Qiguang Lin, IBM Watson Research; and Johan Liljencrants, Royal Institute of Technology

---

---

1. [Search for Unexplored Effects in Speech Production](#) C.H. Coker, M.H. Krane, B.Y. Reis, R.A. Kubli
  2. [Computational Models for Speech Generation](#) S. Levinson
  3. [Articulatory Synthesis from X-rays and Inversion for an Adaptive Speech Robot](#) P. Badin, C. Abry
- 
- 

## FrP2L1 -- Speaker Adaptation and Normalization II

Chair: Aaron E. Rosenberg, AT&T Labs - Research

---

---

1. [Adaptive Recognition Method Based on Posterior Use of Distribution Pattern of Output Probabilities](#) Jin-Song Zhang, Beiqian Dai, Changfu Wang, Hingkeung Kwan, Keikichi Hirose
  2. [Iterative Unsupervised Adaptation Using Maximum Likelihood Linear Regression](#) P.C. Woodland, D. Pye, M.J.F. Gales
  3. [A Compact Model for Speaker-Adaptive Training](#) Tasos Anastasakos, John McDonough, Richard Schwartz, John Makhoul
  4. [Iterative Unsupervised Speaker Adaptation for Batch Dictation](#) Shigeru Homma, Jun-ichi Takahashi, Shigeki Sagayama
  5. [Rapid Unsupervised Adaptation to Children's Speech on a Connected-Digit Task](#) Daniel C. Burnett, Mark Fanty
  6. [Speaker Adaptation Using Tree Structured Shared-State HMMs](#) Jun Ishii, Masahiro Tonomura, Shoichi Matsunaga
- 
- 

## FrP2L2 -- Spoken Language and NLP II

Chair: David Roe, AT&T Labs - Research

---

---

1. [Learning to Parse Spontaneous Speech](#) Finn Dag Buo, Alex Waibel
  2. [Spontaneous Speech and Natural Language Processing ALPES: A Robust Semantic-led Parser](#) Jean-Yves Antoine
  3. [The Natural Language Processing Module for a Voice Assisted Operator at Telefónica I+D](#) J. Alvarez-Cercadillo, J. Caminero-Gil, C. Crespo-Casas, D. Tapias-Merino
  4. [Compound Words in Large-Vocabulary German Speech Recognition Systems](#) André Berton, Pablo Fetter, Peter Regel-Brietzmann
  5. [Prosody, Empty Categories and Parsing - A Success Story](#) Anton Batliner, A. Feldhaus, S. Geissler, T. Kiss, Ralf Kompe, Elmar Nöth
  6. ["Almost Parsing" Technique for Language Modeling](#) B. Srinivas
- 
- 

## FrP2L3 -- Duration and Rhythm

Chair: Dik J. Hermes, Institute for Perception Research / IPO

---

---

1. [From Segmental Duration Properties to Rhythmic Structure: A Study of Interactions Between High and Low Level Constraints](#) *Marise Ouellet, Benoît Tardif*
2. [Analysis of Context-dependent Segmental Duration for Automatic Speech Recognition](#) *Xue Wang, Louis C. W. Pols, Louis F. M. ten Bosch*
3. [The Role of the Rhythmic Groups in the Segmentation of Continuous French Speech](#) *Delphine Dahan*
4. [The Implications of Temporal Patterns for the Prosody of Boundary Signaling in Connected Speech](#) *Zita McRobbie-Utasi*
5. [Experimental Phonetic Study of the Syllable Duration of Korean with Respect to the Positional Effect](#) *Hyunbok Lee, Cheol-jae Seong*
6. [Timing of Pitch Movements and Accentuation of Syllables](#) *Dik J. Hermes*

## FrP2P1 -- Acoustic Analysis

*Chair: Peggy Nelson, University of Maryland at Baltimore*

1. [A Probabilistic Approach to AMDF Pitch Detection](#) *Goangshuan S. Ying, Leah H. Jamieson, Carl D. Michell*
2. [From Sagittal Cut to Area Function: An RMI Investigation](#) *Alain Soquet, Véronique Lecuit, Thierry Metens, Didier Demolin*
3. [Pitch Detection and Voiced/Unvoiced Decision Algorithm Based on Wavelet Transforms](#) *Léonard Janer, Juan José Bonet, Eduardo Lleida-Solano*
4. [Decomposition of Speech Signals into a Deterministic and a Stochastic Part](#) *Yannis Stylianou*
5. [Improved Glottal Closure Instant Detector based on Linear Prediction and Standard Pitch Concept](#) *Cheol-Woo Jo, Ho-Gyun Bang, W.A. Ainsworth*
6. [Analysis of Speech Segments using Variable Spectral/Temporal Resolution](#) *Xihong Wang, Stephen A. Zahorian, Stefan Auberg*
7. [Time-based Clustering for Phonetic Segmentation](#) *Brian Eberman, William Goldenthal*
8. [Formant Analysis Using Mixtures of Gaussians](#) *Parham Zolfaghari, Tony Robinson*
9. [Deriving Articulatory Representations from Speech with Various Excitation Modes](#) *Hywel B. Richards, John S. Mason, Melvyn J. Hunt, John S. Bridle*
10. ["Blind" Speech Segmentation: Automatic Segmentation of Speech Without Linguistic Knowledge](#) *Manish Sharma, Richard J. Mammone*
11. [Speech Synthesis Using a Nonlinear Energy Damping Model for the Vocal Folds Vibration Effect](#) *Hiroshi Ohmura, Kazuyo Tanaka*
12. [Neural Networks Learning with L1 Criteria and Its Efficiency in Linear Prediction of Speech Signals](#) *Munehiro Namba, Hiroyuki Kamata, Yoshihisa Ishida*
13. [Preprocessing and Neural Classification of English Stop Consonants \[b,d,g,p,t,k\]](#) *A. Esposito, C. E. Ezin, M. Ceccarelli*
14. [A Comparison of Modified k-means\(MKM\) and NN based Real Time Adaptive Clustering Algorithms for Articulatory Space Codebook Formation](#) *K.S. Ananthakrishnan*
15. [A Novel Approach to the Estimation of Voice Source and Vocal Tract Parameters from Speech Signals](#) *Wen Ding, Hideki Kasuya*
16. [Syllable Detection in Read and Spontaneous Speech](#) *Hartmut R. Pfützinger, Susanne Burger, Sebastian Heid*
17. [Maximum Likelihood Learning of Auditory Feature Maps for Stationary Vowels](#) *Kuansan Wang, Chin-Hui Lee, Biing-Hwang Juang*
18. [Explicit Segmentation of Speech using Gaussian Models](#) *Antonio Bonafonte, Albino Nogueiras, Antonio Rodriguez-Garrido*
19. [A Comparison of Several Recent Methods of Fundamental Frequency and Voicing Decision Estimation](#) *E. Mousset, W.A. Ainsworth, José A. R. Fonollosa*
20. [Robust Pitch Estimation with Harmonics Enhancement in Noisy Environments Based on Instantaneous Frequency](#) *Toshihiko Abe, Takao Kobayashi, Satoshi Imai*
21. [Integrated Polyspectrum on Speech Recognition](#) *Asunción Moreno, Miquel Rutllán*

## FrP2S1 -- Physics and Simulation of the Vocal Tract II

*Chairs: Qiguang Lin, IBM Watson Research; and Johan Liljencrants, Royal Institute of Technology*

1. [Analysis of Acoustic Properties of the Nasal Tract Using 3-D FEM](#) *Hisayoshi Suzuki, Takayoshi Nakai, Hiroshi Sakakibara*
2. [Experiments with Analysis By Synthesis of Glottal Airflow](#) *Johan Liljencrants*
